

Biswajit Nayak

Software Engineer

Profile

Software Engineer with **4+ years** in software development and **3+ years** in **application maintenance**. With core expertise in **Ruby on Rails**, I adapt to evolving project needs, ensuring timely and effective solutions in dynamic settings. I excel at delivering scalable solutions, meeting project deadlines, and adapting to dynamic environments. Known for designing and maintaining applications, troubleshooting critical issues, and gathering user feedback for continuous improvement.

Employment History

Software Engineer at Weinvest, WFH

July 2020 — Present

As a **Software Engineer** at **Weinvest**, I am responsible for the design, development, and maintenance of software applications. I collaborate with cross-functional teams to gather requirements, analyze user needs, and deliver effective software solutions. My role involves development, testing and debugging activities to ensure the functionality and performance of the software.

Project: Wealth Management System

- Write clean, efficient, and well-documented code following best practices and coding standards using **Ruby on Rails** along with RSpec.
- Resolved critical **bugs** and issues to ensure the stability and reliability of the system.
- Perform **code reviews** and provide constructive feedback to team members to enhance code quality and foster best practices
- Participated in **Agile workflows**, helping to complete sprints 20% faster by prioritizing tasks and addressing blockers.
- Collaborated with the customer success team and product managers to gather feedback and implement improvements based on user requirements.
- Experienced in **ETL** processes, particularly with **Pentaho**, for efficient data integration and transformation.
- Kept up with the latest in Ruby on Rails, applying updates to improve application performance by 15%

Customer Success Engineer at Jiffenow (now part of Cvent)

February 2017 — April 2020

During my time at **Jiffenow** as a **Customer Success Engineer**, I played a key role in ensuring the successful implementation and adoption of the Jiffenow platform by clients. I provided technical support, conducted training sessions, and addressed any product-related queries or issues to ensure a seamless customer experience.
