SKILLS

- **Programming Languages & Frameworks:** Ruby, JRuby, Ruby on Rails, SQL, JavaScript (React.js, Stimulus JS, Vue JS), Java, Python (Familiar), HAML, HTML, CSS
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch
- **Cloud & DevOps:** AWS (EC2, S3, RDS, CodePipeline, CloudFront), Docker, GCP (Familiar), CI/CD (GitHub Actions), Git
- **Third-Party Integrations:** ZXing (Barcode Scanning), Surepass, Razorpay, Stripe, Billdesk PG, Text Local
- **Tools:** Jira, GitHub, GitLab, Trello
- **Testing & Automation:** RSpec, Capybara, Test Cases (Unit, Integration, End-to-End), Test-Driven Development (TDD), Sidekiq (Background Jobs)
- **Methodologies & Soft Skills:** Agile (Scrum), Team Leadership, Prompt Engineering, CI/CD Pipelines, Deployment Automation, Debugging, Research & Development (R&D)

EDUCATION

MASTER'S DEGREE
2021 - 2023

BACHELOR'S DEGREE
2018 - 2021

PROFILE

I am a Full Stack Developer with over 3 years of experience in building web applications using Ruby on Rails and popular JavaScript frameworks like React.js and Vue.js. I have a solid background in database management and working with cloud services like AWS. I enjoy integrating third-party services and applying TDD to ensure high-quality code. I thrive in Agile teams and am always eager to learn new technologies to improve my skills and deliver better solutions.

EXPERIENCES

Decabits Software, Delhi (Remote) *Senior Software Engineer*

06/2023 - Present

- **Application Development & Technology Stack:** Developed and maintained web applications using Ruby on Rails, React.js, and Vue.js, focusing on responsive design and performance optimization. Managed databases like PostgreSQL and MySQL to ensure data integrity and efficient querying.
- **Client Interaction & Team Management:** Actively interacted with clients to gather requirements and provide progress updates, ensuring their needs were met. Led a team of junior developers, mentoring them in best coding practices and promoting collaboration.
- **Cloud Services & DevOps:** Deployed applications on AWS using services such as EC2 and S3 to enhance scalability and reliability. Implemented CI/CD pipelines to streamline the deployment process, ensuring rapid delivery of updates.
- **Quality Assurance & Code Reviews:** Utilized Test-Driven Development (TDD) with RSpec and Capybara to maintain high-quality code. Conducted code reviews to uphold coding standards and foster knowledge sharing within the team.

Shriffle Technologies Pvt Ltd, Indore *Software Developer*

08/2021 - 05/2023

- **Web Application Development & Database Management:** Developed robust web applications using Ruby on Rails and JavaScript frameworks (Stimulus JS, Vue Js), focusing on high performance and responsive design. Managed and optimized PostgreSQL and MySQL databases, ensuring data integrity and efficient querying.
- **Client Collaboration & Third Party Integration:** Actively collaborated with clients to gather requirements, deliver tailored solutions, and ensure satisfaction. Integrated various third-party services, enhancing application functionality and user experience.
- **Deployment, CI/CD & API Development:** Deployed applications using Capistrano and implemented CI/CD practices to streamline updates and maintain application stability. Developed RESTful APIs for smooth communication between frontend and backend, enhancing user experience.
- **Debugging & Research & Development (R&D):** Cultivated strong debugging skills through hands-on experience, enabling quick identification and resolution of issues. Engaged in R&D to explore new technologies and approaches, driving innovation and improvements in application functionality.

PROJECTS

Kontoro Labs

- Implemented key features in Kontoro Labs, including social media signup/login, subscriptions, variations, and gate functionality using Ruby on Rails and React JS.
- Enhanced deployment processes by creating and maintaining Dockerfiles, configuring AWS services (EC2, RDS).
- Developed and optimized backend APIs for seamless integration with frontend components, enhancing overall application performance and user experience.
- Configured frontend deployment using S3 for storage, CodePipeline for CI/CD, ensuring efficient and reliable delivery of updates.
- Utilized the Administrate gem for managing the admin interface, and employed Elasticsearch for enhanced search capabilities.

Zytrack

- Developed and maintained a web application using Ruby on Rails, PostgreSQL, and frontend technologies including JavaScript, HTML, CSS, Tailwind, jQuery, Stimulus JS, and ERB.
- Resolved critical bugs and functionality issues to ensure a seamless and error-free user experience. Implemented advanced datatable features with sorting and searching, enhancing data accessibility and user interaction.
- Created and optimized responsive frontend components using Stimulus JS and JavaScript frameworks for a dynamic user interface.
- Applied best practices in performance optimization, code quality, agile methodologies, and CI/CD processes, utilizing tools like Git, Capybara, and RSpec for testing.
