Summary

B2B SaaS & Tech Content Writer with 3.5+ years of experience specializing in translating complex technical concepts into clear, high-authority long-form content. With a **Bachelor's Degree in Computer Engineering**, I bring a technical edge to B2B content across the **Cybersecurity, Risk & Compliance, and HR Tech** domains, among others. I focus on deep research and user intent to drive organic traffic, ensuring every piece—from guides to white papers—is optimized for search rankings and readability.

Skills

- On-page SEO/GEO, keyword intent analysis, content structuring, visual hierarchy
- Primary niches (B2B): Cybersecurity, GRC, SaaS, HR Tech, CX Tech
- In-depth research, finding relevant facts/statistics, thought-leadership content

Content Types I specialize in

- Long-form blog posts and guides (BOFU/MOFU/TOFU focus)
- Lead magnets: White papers and eBooks
- Op-eds (editorials) and thought-leadership articles
- Technical explainers

Tools I am well-versed with

- Writing and editing: Microsoft Word, Google Docs, Grammarly Premium, Hemingway Editor
- Project management and collaboration: Notion, Slack, Asana, Clickup

Experience

Freelance Content Writer

- **2022-Present**
- Own the creation of high-impact, long-form SEO content for B2B clients, driving authority and trust in competitive niches including SaaS, HR Tech, Risk & Compliance Management, and Cybersecurity.

- Leverage engineering background to break down intricate concepts (e.g., AI & Automation, Data Privacy, Cloud Security, Digital Transformation) into intuitive, easy-to-digest explanations for founders and C-suite leaders.
- Execute comprehensive content structuring, including optimized headings, internal linking strategies, and formatting for maximum readability and user experience.

Education

- **Bachelor's Degree in Computer Engineering**
- V. V. P. Engineering College, Rajkot, Gujarat, India.
- Completed – 2009

Cover Letter

I am writing to express my interest in the Content Writer role.

As search behavior shifts in 2026 toward AI-driven results and LLM conversations, standard SEO is no longer enough. Brands need content that ranks higher in Google Search results, captures AI Overviews, satisfies LLM queries, and maintains deep technical accuracy.

This is exactly what I deliver. **More than half of the published content I have crafted has been ranked on Page 1 of Google search results, cited in AI overviews, or both.**

I am a **B2B Content Specialist with 3.5 years of experience** (including 2.5 years in an agency environment). I combine my technical literacy and in-depth topic research with a focus on On-page SEO and GEO strategies.

My Domain Specializations:

- **Cybersecurity & GRC:** Deep experience in writing about AI-powered cybersecurity, zero trust architecture, threat management, risk management, and compliance frameworks and regulations (GDPR, HIPAA, ISO 27001, SOC 2, NIST, PCI DSS).
- **HR Tech & CX Tech:** Specializing in content regarding the intersection of people and platforms (specifically AI automation in CX and EX, HR and HR Tech solutions, and related SaaS products).
- **Broader IT:** Cloud Computing, FinTech, Automation, Robotics

How I drive results for modern B2B content:

- **SEO & GEO strategy:** I write for both humans and AI. I structure content using conversational Q&A formats and entity-based targeting to maximize visibility in Google Search Results (SEO) and AI Overviews (Google SGE, ChatGPT, Perplexity), ensuring your brand (or your client's) owns the direct answer and is regarded as a domain authority.
- **Domain expertise:** With a Bachelor's Degree in Computer Engineering, I don't just write about tech; I conduct in-depth research, understand complex topics, and convert them into clear, concise, and engaging content without losing nuance.
- **Audience adaptability:** I learn fast and can adapt my tone and technical depth to speak directly to diverse audiences, whether writing high-level trends analysis for C-Suite executives or granular security/compliance guides for hands-on practitioners.
- **Authoritative linking:** Beyond standard on-page SEO (natural keyword inclusion, content structuring, brand tone alignment), I elevate content by including deeply researched facts, quotes, and statistics (from highly credible and relevant sources) and internal linking as required. This approach turns standard articles into highly linkable assets that naturally support digital PR and broader organic growth strategies.
- **Full-Funnel Content:** I excel at writing long-form content across various formats, guiding leads through the entire marketing funnel. This includes Blog Posts, Tech Guides, Comparison Posts, Thought-Leadership Articles, White Papers, and eBooks.

I'm excited to bring my technical expertise and organic growth mindset to your content marketing efforts. Looking forward to connecting with your team.

Kaushal Shah
