Agile Methodology	JIRA / Confluence	Document Development Lifecycle (DDLC)	Trello
MSTP	TechSmith Snagit	Adobe Acrobat	GIT

PROFESSIONAL EXPERIENCE

TechWise Digital (Bengaluru)

May 2025 - Present

- Create and maintain end-user documentation, including user guides, release notes, knowledge base articles, and process documentation for web-based applications.
- Collaborated with product managers, developers, and QA teams to gather requirements and translate complex technical information into clear, user-friendly content.
- Developed step-by-step workflows and visual documentation using Scribe and Snagit, improving user understanding and task efficiency.
- Managed the documentation lifecycle in Agile environments using Confluence, Jira, and Trello, ensuring timely delivery and version control.
- Updated documentation in line with product enhancements, UI changes, and feature releases to maintain accuracy and relevance.
- Ensured documentation quality, consistency, and adherence to style guidelines through regular reviews, editing, and stakeholder feedback.

YDI Solutions Private Limited (Bengaluru)

Dec 2022 - Apr 2025

- Developed and maintained comprehensive end-user documentation and release notes for software applications, ensuring clarity, accuracy, and accessibility for diverse audiences.
- Created structured, reusable content using Oxygen XML Author and DITA principles to support scalable documentation frameworks.
- Collaborated with cross-functional teams, including SMEs, developers, and engineers, to gather requirements and validate technical content.
- Researched complex technical concepts and translated them into clear, concise, and user-friendly documentation for non-technical users.
- Ensured consistency, quality, and adherence to company style guides and industry best practices across all documentation deliverables.
