

SUMMARY	
• 6+ years of software development experience with early stage product-based startups • 1 year of product management experience with small-sized service-based startups • Proficient in working with multiple business teams, to design and develop various revenue-impacting features with end-to-end ownership and quick turnaround times.	
WORK EXPERIENCE	
Product Manager (Consultant) at Agency.in	<i>Jan 2018 onwards</i>
❖ Building a proof of concept and creating user stories for a client, to use Keycloak as a tool for employee management and identification ❖ Managing sprints and handling deploy and release procedures for an F&B portal ❖ Managed a team of designers to create designs for the search experience and booking flow for a startup releasing a train ticketing (IRCTC) platform. ❖ Complete ownership of a PWA that is a job portal for blue collar workers in SE Asia - working directly with the client to ideate and define the scope of the product, designing wireframes, sprint planning, managing developers, QA and tracking timely releases. ❖ Building components for a website creation & management portal that caters to OTAs	
Senior Software Engineer at Idyllic Software	<i>Jan 2017 - Sept 2017</i>
❖ Sprint planning and code reviews for multiple ongoing projects ❖ Bug fixes for an existing project with the Sears B2B website ❖ SSO implementation for Pepboys - an automotive retail and service chain in USA	
Senior Developer (Contract) at LocoPoco Technology Ventures Pvt. Ltd.	<i>June 2016 - Nov 2016</i>
❖ Helped with building APIs for user onboarding, contact & phone book sync and chat ❖ Added code for improved estimated time of arrival/departure, better location tracking & distance matrix calculations. ❖ Managed dev-sprints on Asana and helped with data analysis for future development cycles	
Senior Software Engineer at Urban Ladder Home Decor Solutions	<i>January 2013 - May 2016</i>
Being the third engineer at Urban Ladder, I have built several features across the website from scratch. Over time, I have worked closely with PMs to outline PRDs and tech-design docs, along with coding and code reviews and also served as the org-wide point of contact for quick fixes and reliable solutions ❖ Led projects to build a recommendation engine for best-selling related products across the catalog, a 'Dynamic Bundling' service for cross-selling across categories and a taxonomy and navigation revamp for improved click-throughs and conversion ratios. ❖ Conceptualized and built an internal systems for NPS and analytics/marketing reports, along with developing data feeds for third party ads and retargeting ❖ Worked with teams for 3-5 developers to build Wishlist APIs and an in-house multi-blog platform for FAQs & corporate communication ❖ Conceptualized and coded a module for customer testimonials to capture customer feedback real-time from Instagram and Facebook ❖ Migration of code base for the entire catalog from Magento (php) to Spree (Ruby on Rails)	

Software Engineer at Fab.com		<i>June 2011 - January 2013</i>
Worked in teams of 3-5, under the guidance of a tech-lead on discount modules for holiday seasons, a live feed of wishlisted items, social shares and purchases, logged out user experience based on IPs across USA and EU and several other key features.		
MATLAB Trainee at Ixia Communications		<i>September 2010 - Mar 2011</i>
Used MATLAB models and Wavejudge to test the physical channel of an LTE system.		
EDUCATION		
North Carolina State University (NCSU)	Raleigh, USA	2010
College of Engineering, Pune (CoEP)	Pune, India	2008
