Summary

- A dynamic professional **with 6 years of experience** in Software Testing & Project Coordination (PRINCE 2 certified).
- Knowledge of automation testing tool like **Selenium** and bug tracking tool like **Bugzilla**.
- Thorough involvement in all stages of **Software Testing Life Cycle (STLC)**.
- Extensively worked on **Functional Testing, Report testing, and maintaining Bug log report**.
- Adept in **Integration Testing, GUI Testing, Product Testing, System Testing, Regression Testing**, Smoke Testing, and Build Verification Testing.
- Coordinated with Testers, Team Leads, and Business Managers for testing product, modules in scheduled time bound manner.
- Team player with strong communication skills & proficiency at grasping new technical concepts quickly and utilizing the same in a productive manner.

Areas of Exposure

Software Testing

- Creating Test Cases and procedures for carrying out unit / integration / system / performance / compatibility / regression tests at various stages in the Software Development Life Cycle.
- Analyzing the testing requirements and testing data; conducting requirement gathering meetings with clients & utilizing analytical skills to develop effective test cases.
- Performing various kinds of testing, viz. smoke testing, functional testing, integration testing, regression testing, system testing, performance testing and usability testing.

Organisational Scan

Career Campus, Nagpur Software Engineer	Dec'14 to Oct'17
GIF Technologies pvt. Ltd., Nagpur Software test Engineer	Nov'12 to Nov'14
Infimetrics info solutions, Nagpur Software test Engineer	May'10 to Oct' 12
Priyadarshini College of Engineering, Nagpur Lecturer	Aug'09 to Apr'10

Academic Credentials

- MCA from RTM Nagpur University in 2008.
- B.Sc. (Electronics) from RTM University Nagpur in 2004.
- HSC from Nagpur Board, Nagpur in 2001.
- SSC from Nagpur Board, Nagpur in 1999.

Other Credentials

- Diploma in Software Testing (DST).
- PRINCE 2 CERTIFIED.

Skill Matrix

Software Q/A:	Standards & Procedures Development, SDLC Testing, Test Plan, Design & Development, Planning Automated Testing Strategy.
Testing Tools:	Test Director, Bugzilla, Selenium and QTP.
Languages/Tools:	C++, C#.Net, ASP.NET.
Databases:	SQL Server 2000.
Operating System:	Windows 2000/XP/Vista and DOS.

Professional Experience

Project:	Education Domain (ERP)
Testing Tool:	Manual testing & Bugzilla for bug tracking.
Description:	This ERP is created for the school's activities like Admissions & enquiry processing, daily attendance , students homework, assignments posting, students fees collections & there invoice & receipt generations, Mailing to the parents regarding there ward's progress, progress report generation, several other finance related reports etc. A overall processing is automated through this ERP.
Role:	Done test Planning, Created test cases, manual testing & Integration testing. Currently working on Testcase automation using Selenium as a tool.
Project:	Education Domain (Finance ERP)
Testing Tool:	Manual testing, used bug tracking tools.
Description:	Track enterprise-wide financial data and manage institutional budget. Manage complex billing needs for varying populations and programs with ease. Control access to critical information and eliminate duplicate data entry. Integrate financial and student records for reliable access to current information. Increase productivity and accuracy with time-saving features. Reports for easy understanding & analysis of data.
Role:	Direct Interaction with client for requirements & test scenarios. Created test cases & done manual testing.
Project:	MyGIIS App (IOS Application).
Testing tool:	Manual testing & Bugzilla for bug tracking.
Description:	It is IOS application specially created for staff & parent. Through which parent can view there mails, parent teacher meet schedules, can edit there profile details they have furnished at the time of admission, etc. they can also see there other important details. And teacher/staff can view there mails, leave information also they can apply leaves from the applications.
Role:	Test planning, created test cases & done manual black box testing & bug locking in Bugzilla.
Project:	MyGIIS Transport App (Android Application).
Testing tool:	Manual testing & Bugzilla for bug tracking.
Description:	It is android application specially created for staff to look after transport (e.g. school bus positions, in school bus student's daily attendance likewise daily driver & conductor attendance, etc) Through which school staff can view the bus details & can also track the bus positions. Also the bus conductor can see for the students status (e.g is the student in the particular bus is withdrawn himself, or opted for stoping bus services etc.)
Role:	Test planning, created test cases & done manual black box testing & bug locking in Bugzilla.
Project:	Jamaat Office Automation System
Development Tool:	C#.NET, SQL Server 2000
Description:	This project was to manage daily work of Jamaat office. C#.NET was used as front end and SQL server 2000 was used as back end. This reduced the time for the process of maintaining records as everything was accessible at one place.
Role:	Handled Software Development, Unit Testing & Integration Testing.

Project: **Government Dental College Nagpur Automation System**
Development Tool: C#.NET, SQL Server 2000.
Description: This project was used for fast and easy processing, maintaining patient's data, etc. This software was used to reduce the paper work done till date.
Role: Worked on Software Development & also Done Unit Testing & Integration Testing.

Responsibilities

- Having experience in **agile testing methodologies**.
- **Testing done in scheduled time bound manner**.
- Time to time review & **worked according to the SRS & Requirement documents**.
- **Direct Client Communication was done** for better understanding of the requirement.
- **Estimation** of new work (new screens), and bug finding for the same.

Personal Dossier

Date of Birth: 21st Dec'1982.
