<https://giftcards.zaggle.in/>

Experience at PegaSystems

Solutions Engineer – CRM (Nov 12, 2016 to Nov 11, 2018)

Being a scrum master I used to gain knowledge about all Epics planned in a release and here are some of my works.

Pega Free trial - 30 Days platform

This platform free trial is the fastest way to experience the simplicity and power of the Pega Platform. This trial gives you access to one of our four role-based authoring studios: App Studio.

Omni-channel customer experience

Pega Customer Service includes integrated, multi-channel systems capable of managing telephone (inbound and outbound), Web and mobile chat, email, Web self-service, fax, and white mail service interactions.

UI Kit 11

It offers new design templates, Cascading Style Sheet (CSS) helper classes, and core icons, which bring greater consistency to applications built with Pega® Platform. Sidebar navigation enhancements improve usability and increase the visibility of recent items.

Anonymous customer interactions

The anonymous customer interactions functionality helps customer service representatives assist customers who are not identified in the application through chat, email, phone, or social channels.

Pega Knowledge

Customers want answers. Customer service agents want to help. Pega Knowledge is power to provide the most relevant information at the right time, to get everyone where they want to go. With AI-powered content suggestions and guided troubleshooting.

Guided tours

A guided tour enables you to showcase the key features on user forms or portals by providing users with information, instructions, or controls in a sequence of pop-up windows called tour stops.

Customer decision hub

With Pega's Next-Best-Action Designer, you can configure and control all of your one-to-one decision strategies from a single interface – with best-practice guardrails built right in.

Pega App Studio

Pega's App Studio provides a single, fast, unified platform experience to build and modify rich business applications. It provides a highly intuitive no-code environment with simplified potential of Pega's platform capabilities including a responsive authoring experience, business process templates, seamless integration and data management, personalized dashboards, reporting, and other business-specific capabilities.

Self service Advisor & ChatBot

Pega Self-Service Advisor uses Pega's proven artificial intelligence engine to surface the information and experience the customer needs in the moment by analyzing their past engagement history and current site movements. For the first time, customers can simply click a "Need Help" button from any page to access a dynamic screen overlay with customized links and possible actions. This experience wraps around them.

Experience at Soffice global technologies

Click&Pay

Co-founder & Architect (May 1st 2016 to 10th Nov 2016)

Built a mobile based payment solution company. we help users to make payments in a smart way by providing them to find the best offers in their locality and cashbacks on successful transactions. Users can also send/request money to their pals.

Merchants can take advantage of the unique marketing and payment platform with sophisticated customer management tools. Click and Pay allows them to increase profit margins by identifying customers spending.

Experience at Virtusa

AIG Pega 7 Upgrade, American Insurance Group

Engineer – Technology (feb 1st 2015 to 1st May 2016)

OneClaim is a Single Claims platform to drive standardization and best practice for Claims Organization Globally. Using the current OneClaim application we can capture the FNOL and perform adjudication. Adjusters can create reserves for the claims and send out the payment notification to the downstream application which will credit the payment to the claimant. The application is already in live on PRPC Version 6.2 SP1 and now is being upgraded to PRPC 7.1.6. The main intention behind this upgrade is to incorporate the features of Pega 7 like Cross Browser Compatibility, Responsive UI and High Availability.

AIG,NAM UPGRADE

Associate Engineer – Technology (25th Nov 2014 to Feb 2015)

Analysis of logs to debug the issues.
Worked with Clipboard and Tracer for troubleshooting the issues
Participated in daily client calls.
Defect Fixing and unit testing.
Worked for localization
Worked for production support
Designing common and reusable user interfaces in framework layer for all the line of businesses.
Guiding the team members in functional aspects and helping the fresher's in both functional and technical aspects.

Training

- Completed training on PEGA in Virtusa by the training team.
- Frugal Innovation at NIT
- Amazon web services at TechMinfy

Education

- **B Tech in Computer Science, Maharaj Vijayaram Gajapathi Raj College of Engineering (2010-2014).**

Achievements & Certifications
