

Shiva Chakravarthi

Backend Ruby on Rails Developer

Hyderabad, Telangana, India

☎ +91 8309949392 | ✉ chakrawarthy123@gmail.com

Professional Summary

Backend Ruby on Rails Developer with **3+ years of experience** building scalable, API-driven web applications and loyalty platforms. Strong expertise in **Ruby on Rails, PostgreSQL, Sidekiq, and social-media-driven reward systems**. Proven ability to optimize performance, integrate third-party services, and deliver production-ready backend solutions aligned with business goals.

Core Skills

Languages & Frameworks: Ruby, Ruby on Rails, Java, JavaScript

Backend & APIs: RESTful APIs, JWT Authentication, MVC, ActiveRecord

Databases: PostgreSQL, SQL

Background Jobs: Sidekiq, Redis

Integrations: Instagram APIs, Firebase Cloud Messaging (FCM), WhatsApp Business API, Razorpay, Stripe, Twilio

Tools: GitHub, GitLab, Bitbucket, ActiveAdmin

Testing: RSpec

Operating Systems: Ubuntu, Windows

Professional Experience

Clink AI Technologies — Backend Developer

Nov 2025 – Present

- Backend developer for **Clink Rewards**, a social-media-driven customer loyalty and rewards platform.
- Designed and implemented **RESTful APIs** for loyalty programs, reward allocation, point redemptions, and offer lifecycle management.
- Built **Instagram engagement reward workflows**, supporting instant and conditional rewards without blocking merchant onboarding.
- Implemented **bill-based reward calculations**, reward caps, and fraud-prevention logic.
- Architected **background job processing using Sidekiq** for reward expiry, campaign triggers, and user notifications.
- Integrated **Firebase Cloud Messaging, WhatsApp Business API, and email services** to improve customer engagement and retention.

- Optimized **PostgreSQL queries and indexing**, improving API response times and scalability.
- Collaborated closely with product managers, frontend engineers, and QA teams to deliver high-impact backend features.

Project: Clink Rewards

- Social-media-based loyalty platform enabling brands to reward users for Instagram engagement and purchases.
 - Built APIs for **points accrual, redemption, reward journeys, and offer management**.
 - Implemented structured error handling, logging, and monitoring to improve production reliability.
-

ClientServer Technology Solutions LLC — Associate Software Engineer

Dec 2024 – Nov 2025

- Contributed to **eConveyance**, a real-estate conveyancing and document management platform.
- Enhanced legacy **Ruby on Rails** modules to improve performance, security, and maintainability.
- Optimized complex SQL queries and added logging for better production debugging.
- Implemented features for document handling, template management, client data export, and property transactions.

Project: eConveyance

- Digital platform for managing property transactions, legal documents, and compliance workflows.
- Integrated third-party services including title search and LTSM systems.
- Implemented JWT-based authentication and authorization.

Project: Content Management System (CMS)

- Backend-driven platform for article creation, editing, scheduling, and publishing across multiple sites.
 - Built REST APIs for content management, publishing workflows, and role-based access control.
 - Supported scheduling logic and content visibility rules to streamline editorial operations.
-

Extended Web App Tech — Software Engineer

Jun 2022 – May 2024

- Worked across the full software development lifecycle on multiple Ruby on Rails applications.
- Designed and implemented scalable **RESTful APIs**.
- Implemented **Ransack-based search optimization**, significantly improving search performance.
- Performed database migrations, table renaming, and schema updates while maintaining data integrity.
- Built integrations and backend features for production systems.

Key Projects

- **E-Job Portal:** Recruiter and job seeker dashboards, job posting, application tracking, advanced search & filters, and third-party integrations.
 - **Learning Management System (LMS):** Authentication, role-based dashboards, assessments, assignments, and background job processing.
-

Education

- **B.Tech in Civil Engineering** — Annamacharya Institute of Technology & Sciences, 2021 (CGPA: 6.72)
 - **Diploma in Civil Engineering** — TRR Institute of Technology, 2018 (CGPA: 6.2)
-

Additional Strengths

- Strong ownership of backend features from design to deployment.
 - Experience working with legacy Rails applications and production systems.
 - Effective collaborator with cross-functional teams.
 - Focused on clean code, performance optimization, and scalable system design.
-
