Phone: +91 8800003269 | *Linkedin:* linkedin.com/in/surabhiisaxena/

PROFESSIONAL SUMMARY

11 years of IT experience, including 6 years as a Technical Content Designer and Writer, for Compilers, and Wireless Telecom hardware & software technologies using DITA XML, and 5 years as a Software Developer using SDL, C, C++, Python scripting. Experience working across Linux and Windows environments, collaborating with global engineering teams. Recognized for diligence, professionalism, quick learning, and ability to simplify technical complexities. Adaptive, Agile-driven, skilled at handling ad hoc tasks and deadlines, with a strong passion for design.

EDUCATION: Bachelor of Technology (B. Tech), Computer Sciences & Engineering, Dr. A.P.J. Abdul Kalam Technical University (AKTU), Uttar Pradesh

SKILLS & EXPERTISE: Technical documentation | Accessibility compliance | Writing efficient AI prompts | DITA principles | Parallelism, Minimalism incorporation | Active-Voice writing | User experience | Researching | Adaptation to different writing styles | Clear, concise, user-centric writing | task-based writing | Creating content types- Developer documentation, User Guides, Troubleshooting guides, API & CLI documentation, short descriptions | User-experience (UI) planning & feedback | code-snippet reviews | communication skills | Documentation lifecycle management | SDLC | Goal-oriented collaboration | Agile methodologies | Collaboration with global teams across EMEA and North America time zones

TOOLS & TECHNOLOGY: Microsoft Co-Pilot | AI Productivity Assistant | oXygen XML editor | Adobe- Acrobat, FrameMaker | Content management systems (CMS)- Vasant, Modulus | GitHub | Microsoft Office | Snagit | Collaborator, Phabricator | JIRA | Confluence | Notion | CorelDraw | Version control- GIT, SVN | Technology- XML, HTML, SQL, Python scripting, C, C++

WORK EXPERIENCE

Technical Content Specialist

IBM | Bangalore, India

October 2024 – October 2025

Responsibilities:

- Authoring and maintaining IBM Compiler projects- COBOL for Linux x86, Python SDK, Rust, PLI, by collaborating with development stakeholders.
- Balancing strategic initiatives with responsibilities of authoring, editing, and publishing high-quality technical content.
- Ensuring content quality, consistency, & adherence to IBM Accessibility standards.
- Converting content type- HTML source files to DITA source files
- Designing and implementing workflows to track productivity and efficiency in documentation projects, to continuously improve visibility of Compilers project 's contributions aligned with IBM's business outcome goals.
- Mentoring writers- content reviews, onboarding, style guidance
- Performing localization of technical guides by translating content.
- Setting up Git repositories and managing transformations and configurations.
- Identifying inefficiencies in current processes and recommending improvements for structure, usability, and delivery.
- Collaborating with architects, SMEs, hardware and software engineers to capture features and use cases.
- Using metrics (Google Analytics, support tickets) to prioritize fixes, eliminate duplication, and improve findability.

Achievements:

- Leveraged IBM Productivity Assistant and Microsoft Copilot to create content strategies for upcoming projects.
- Introduced a review checklist that streamlined end-of-cycle checks, improving quality and reducing rework across teams.
- Improved discoverability by standardizing short descriptions and link text across compiler topics.
- Led and performed migration of ~20 projects from Oxygen XML to Adobe Experience Manager (AEM) by running validation reports, resolving content errors, ensuring smooth transition overall.

Technical Content Designer

NOKIA | Bangalore, India

Jun 2019 – Aug 2024

Responsibilities:

- Authoring, editing, reviewing, publishing technical customer documentation for Telecom features developed by software teams- GSM, Nokia Wi-Fi, DCAP, UTE, Femto Small Cells, Mantaray RIC.
- Specializing in Task-based writing, Troubleshooting documents, User Guides.
- Providing feedback on the Graphical User Interface (GUI) and fixing bugs.

- Collaborating with product managers and subject matter experts to gather customer's requirements and translate complex technical concepts into clear, concise, and user-friendly content.
- Proofreading documentation for grammar, clarity, and consistency.
- Performing Usability testing and providing feedback.
- Supporting and training internal teams and customers on how to utilize documentation effectively.
- Editing graphics as per company guidelines.
- Code reviewing, documentation organization, peer reviewing.

Achievements:

- Reduced overall documentation effort for a Release by re-structuring how to present the data to the user in a way that made it easier to scan, while also making it easier for writers to document the entire requirements comprising of around 150 parameters.
- Doubled the efficiency of the Documentation sets by re-writing short descriptions and removing duplicity.
- Utilized technical knowledge of GSM to align the whole Documentation set with the latest requirements of the customer.
- Reduced rate of customer cases by half by initiating and performing cleanup of documents- removing grammatical errors, correcting broken links, re-writing ineffective content, and incorporating re-use.

Software Developer

NOKIA | Bangalore, India

Aug 2018 – Jun 2019

Responsibilities:

- Experience of over a year developing and maintaining Radio Cloud Platform (RCP) products like Fronthaul Gateway (FHGW), that facilitates communication between centralized Baseband Units (BBUs) and geographically dispersed Remote Radio Heads.
- Handling User Management & Security, Security Vulnerabilities, Certificate Management.
- Managing VAMS Vulnerability subscription, notifications, package subscriptions, and registering packages used in Waders OS.
- Performing fault corrections and internal improvements using Python scripting.
- Checking and fixing the robustness of existing test cases.

Achievements:

- Single-handedly managed critical security vulnerabilities and assigned relevant pronto(s) driving them to closure.

R&D Engineer

NOKIA | Bangalore, India

July 2014 – July 2018

Responsibilities:

- Developing, coding, testing & maintaining program blocks of BSC (Base Station Controller) O&M SRAN, GSM.
- Developing Module test environments and resolving issues for owned modules.
- Producing Software Design and Module test documentation & performing code reviews and fixed bugs.
- Worked On: PEO (Power Efficient Operation), Enhanced BCCH Energy Saving, DSS (Dynamic Spectrum Sharing), Fast Power Control Support for Dual stack IPV4/IPV6, IOT (Internet of Things)

Achievements:

- Executed changes in Database functions for IoT with minimal resources and produced excellent quality code.
- Took ownership of critical activities regularly, reducing blockages.
- Created a User Guide document which was highly appreciated by Nokia Finland team.

Software Developer Intern

GENPACT | Delhi NCR, India

June 2013 – Aug 2013

Android-iOS mobile application development and testing, using jQuery Mobile & JavaScript.

EXTRA CURRICULAR: Compering for events, taking part in tree plantation drives, organizing re-habitation and TNR drives for stray cats, creating content for SAYTREES ORG for awareness about the importance of trees.

LANGUAGES: English (native speaker), Hindi (native speaker), German (certification course in progress)
