EXPERIENCE

Senior Technical Writer

CBRE

📅 04/2024 - Present 📍 Hyderabad, India

- Created structured, reusable, and modular documentation in DITA XML format using Oxygen XML Editor.
- Uploaded, managed, and version-controlled content using DITA-based CMS, ensuring compliance with Ericsson's topic-based authoring and reuse principles.
- Interacted closely with software architects, developers, and product owners in Agile/Scrum environments to gather technical inputs, clarify feature functionality, and maintain documentation accuracy across sprints.
- Performed content validation and DITA-aware proofreading to ensure documentation is semantically correct, properly structured, and conforms to XML schema rules.
- Created detailed and user-friendly User Manuals and Installation Guides for software.
- Developed comprehensive REST API documentation using tools like Swagger / OpenAPI, Postman, and Markdown.
- Participated in DITA map reviews and contributed to content audits, maintaining high standards of documentation quality and consistency.

Technical Writer And Editor

Microsoft

📅 03/2020 - 03/2024 📍 Hyderabad, India

- Developed user guides for Robotics database application using html and Cider tools.
- Developed and maintained User Manuals, Administrator Guides, API Documentation, and Release Notes for enterprise products handled by Wipro's client accounts.
- Authored Knowledge Base (KB) articles, how-to guides, and FAQ documentation to support L1/L2 support teams and end users.
- Structured KB articles for search optimization and internal linking, enabling faster issue resolution.
- Prepared Release Notes, What's New, Known Issues, and Upgrade Instructions for each software release.
- Developed README files, installation guides, API usage instructions, and developer onboarding content in Markdown.
- Collaborated with engineers through PR comments, tracked changes in Git diff views, and ensured proper commit hygiene (descriptive commit messages, squash merging).

Technical Writer

JK Technosoft Solutions

📅 01/2017 - 05/2019 📍 Bangalore, India

- Integrated documentation into CI/CD pipelines (where applicable) to automate publishing.
- Maintained parity between the product's codebase and the documentation through GitHub version control.
- Attend sprint planning, feature walkthroughs, and design reviews to understand requirements.
- Created getting started guides, walkthrough tutorials, and quickstart integrations for new developers.
- Wrote sandbox/test environment instructions, linking relevant GitHub branches, config files, and required secrets.
- Created clear, concise, and accurate user documentation such as user guides, API docs, release notes, SOPs, FAQs, installation guides, and troubleshooting guides.
- Structure documentation logically using topic-based authoring principles.
- Plan navigation, document hierarchy, and content mapping for different user personas.
- Develop TOCs, content models, metadata, tags, and cross-linking structures.
