SUMMARY OF QUALIFICATION

- **Education:** Masters in Advanced Computer Science (MSc) from University Of Leicester, UK
- **Relevant job skills:** Deep and broader knowledge on web development with 1 year of experience as an intern in Pilot Digital Media, UK
- **Communicational skills:** Effective verbal and written communicational skills and ability to interact professionally with a diverse group

EDUCATION

2013-2015

University Of Leicester UK, Masters in Advanced Computer Science(MSc)

Relevant modules include:

Semester I: Web Technology, Advanced Web Technology, Software Reliability, Advanced System Design

Semester II: Service Oriented Architecture, Financial Service, Semantic Web, Personal and Group Skills.

MSc Project: Online Lecturer Interaction tool (Web Tool)

2008-2012

AMC Engineering College affiliated to VTU, Bachelors Of Engineering (B.E)

Information Science and Engineering

Secured First Class

TECHNICAL SKILLS

- | | |
|------------------------------|-----------------------------------|
| • Languages | Ruby, php, C, C++,Java |
| • Frameworks | Rails |
| • Client Side | HTML, CSS, JavaScript |
| • Database | Sqlite3, MySQL |
| • OS | Windows, Linux, Mac OS |
| • IDE | Netbeans, Eclipse, Visual Studios |
| • Agile Methodologies | Scrum |

RELEVANT WORK EXPERIENCE

➤ June 2014 to August 2015

Web Developer

Pilot Digital Media, UK

- Worked as a front-end developer on a project which was based on e-signature in Pilot Digital Media
- Optimizing Web Assets for optimal speed and performance

- Ongoing design and maintenance for the website
- Testing website for functionality in different browsers

➤ **MSc Project In Brief**

Project name: Pollster

Technology Used: Ruby On Rails, Bootstrap, Javascript, Ajax

Description:

- Pollster is a tool which helps in interaction between the lecturers and the students electronically
- The lecturer posts a question via this application and the questions are made live to the students
- The students will have the access to these questions and the students can submit the answers via this application which will be reflected to the lecturer.
- Once the lecturer receives the reply he can display it onscreen.

➤ **Final Year Project In Brief**

Project Name: Pedestrian Detection using Top-down Recognition and Bottom-up Segmentation.

Platform: MATLAB

Description:

- An object detection method combining top-down recognition with bottom-up segmentation is implemented here.
- It finds its application in automatic driver assistance systems and video surveillance.
- Image analysis, image segmentation were performed
- The outbound of the image is taken and thus identifying the pedestrians present

KEY SKILLS

- Communication skills
- Ability to work under pressure
- Can work efficiently in a team
- Leadership Qualities

INTERESTS

Learning new technologies and trying to apply to my work environment wherever needed.

ADDITIONAL ACHIEVEMENTS

- Have completed pratama, dwitiya in sanskrit
- Have participated in many dancing competitions and won prizes.
