Technology- Ruby, RubyonRails, Postgresql, Elasticsearch, Docker, Kubernetes, HTML CSS, Javascript, Bootstrap, GIT, Humio, Postman, curl , React

ThirdParty Services- Job Bot, Sending Email Through gmail,Chewy, Resume Zapper, AWS

Instadwell

Providing coliving spaces across national and international properties.

Service

- Implemented Google authentication and OTP-based login via email and mobile.
- Extracted property data from third-party platforms like Zolo and Stanza using APIs or web scraping.
- Designed background jobs to efficiently handle data and manual properties bulk uploads via file processing.

Responsibility

- Implemented Single Sign-On (SSO) login and utilized Devise for authentication, ensuring secure access and authentication protocols.
- Developed and maintained an admin page to monitor and manage employer and candidate details, enhancing organizational oversight and efficiency.
- Spearheaded the development of the jobs controller, managing various aspects including employers, enquiries, hotlisted candidates, job alerts, resumes, and job details, facilitating seamless workflow management and data organization.
- Collaborated with cross-functional teams to gather requirements, implement changes, and ensure alignment with client needs, demonstrating adaptability and responsiveness to client requirements.
- Conducted regular code reviews and implemented best practices to ensure code quality, maintainability, and scalability, fostering a collaborative and efficient development environment.
- Proactively identified and resolved technical issues, leveraging debugging techniques and third-party software, to maintain system integrity and performance, minimizing downtime and ensuring a seamless user experience.
- Stayed abreast of industry trends and emerging technologies, continuously learning and implementing new tools and techniques to optimize system performance and drive innovation.

Abilities--

- Proficient in building **RESTful APIs** using Ruby and Ruby on Rails.
- Skilled in writing comprehensive test cases with RSpec in Ruby, ensuring **100% code coverage**.
- Experienced in creating **background jobs** for processing server-side data and file-based inputs.
- Expertise in authentication systems, including **Google Sign-In,Linkedin and OTP-based email/mobile authentication**.
- Proficient in **web scraping using Ruby** and Python, with efficient data mapping to models.
- Strong ability to automate repetitive tasks using logical scripting to enhance productivity.
- Experienced in integrating and optimizing gems like **Nokogiri and Devise**.
- Capable of **designing CMS systems** for clients, enabling easy content, link, and tag management, benefiting SEO teams.
- Adept at **debugging** using logging, print outputs, and third-party tools.
- Strong communication skills, including professional email writing.
- Proficient in **leveraging AI tools for productivity** and continuous learning of new technologies.
- Worked on **rake tasks** to automate background processes, improving system efficiency and reducing manual intervention.
- Implemented **web scraping** to extract data, storing it in an Excel sheet or directly mapping it to models when provided in JSON format.
