

Ahkshaey Ravi

Software Engineer

*'Excellence is a Continuous Process and not an Accident' -
Dr. APJ Abdul Kalam*

Education

- 2009–2011 **Master Technology**, *International School of Information Management, Mysuru, First Class With Distinction.*
Information Systems and Management
- 2005–2009 **Bachelor Technology**, *Amrita Vishwa Vidyapeetham, Bengaluru, First Class With Distinction.*
Information Technology
- 2002–2004 **Pre University Board**, *St. Josephs P.U. College, Bengaluru, Second Class.*
PCMB

Master thesis

- Title *Counterfeit Currency Recognition System*
- Description Created an application that uses Image Processing and Pattern Recognition technology to recognize counterfeit currency notes
- Technology MATLAB (Image Processing Toolbox)

Bachelor thesis

- Title *Electronic Broker Tool*
- Description Created an e-brokerage tool that allows stock brokers to trade stocks online and also delivers up to date stock information. The application adopts the MVC Approach as the base architectural framework.
- Technology Core Java (JSP, Javascript, Servlets, JDBC), HTML, MySQL, Apache Tomcat

1/3

Publications

- Title *Simulation and Analysis of RTS/CTS DoS Attacks Variants in 802.11 Networks*
Description Nagarjun PMD, Anil Kumar V, Aswani Kumar C, Ahkshaey Ravi at PRIME 2013 (International Conference on Pattern Recognition, Informatics and Mobile Engineering, Salem, India)

Industry Experience

- 2012–2014 **Project Assistant, CSIR - Fourth Paradigm Institute, Bengaluru.**
Contributed to CYSERO Project that Involved in developing web based front-end for showing latest network-traffic statistics on the CSIR -4PI-NKN network. Involved in Design of Database that is used to store data pertaining to packet that are captured and collected. Involved in the ongoing development of a daemon program to capture unauthorized traffic for CYSERO project by making use of python scripts.
- Contributed to Deployment of an network test bed with the control centre for the test bed located at CSIR-4PI. Made use of Planet-Lab as an platform to deploy the network test bed. Making use of Linux Containers and V-Server as an mechanism to deploy Planet- Lab.
- Studying and Analyzing the SCTP protocol which involves modifying SCTP source code in Kernel level. Source Code is modified such as to prevent SACK based attacks which is a potential vulnerability of SCTP. Recompilation of Kernel source code and perform tests to study and analyze the results of code modification with respect to SACK based attacks in SCTP.
- 2014–Present **Software Engineer, Axiom Consulting Pvt. Ltd., Bengaluru.**
Involved in building an Initial Proof of Concept Version for VEOL to illustrate the business potential that an Simulation System that is capable of depicting damage caused to a package with respect to Stress, Strain and other external factors using an fair amount of Mathematical Modelling and Visualization to achieve the same.
- Involved in developing an Web Based Application that is used to Predict Shelflife based on Various Packaging Form Factors Using Some Predefined Formulae and other Input Driven Data given by the user to the system. The App has proved to be a Game Changer for the Client for whom it was developed.
- Involved in developing an POC (Proof of Concept) Web Based Application using RoR as an technology enabler that is used to fill Laboratory Observations and Data through an Front End and then generate an report based on the data entered. The report generated follows an strict template that needs to be adhered at any cost.
- Leading a small sized team to build a basic rudimentary version of World's Foremost Digital Mold Qualification Protocol using RoR as a technology enabler that will help the molding industry to bring about huge profits thereby minimising losses which is a common occurrence that hampers the molding industry today

Programming Languages

C, C++	3.0/5.0	Intermediate
Java	2.0/5.0	Beginner
PHP	3.0/5.0	Intermediate
Python	3.0/5.0	Intermediate
Ruby	4.0/5.0	Fairly Proficient

Web Development Skills

JavaScript	3.0/5.0	Intermediate
HTML,CSS	3.0/5.0	Intermediate
Web.Py	3.0/5.0	Intermediate
Rails (RoR)	4.0/5.0	Fairly Proficient

Development Tools

- **Sqlite**, Standalone File Based DataBase Management System
- **MySQL**, Server Based Database Management System
- **PostgreSQL**, Server Based Database Management System
- **MongoDB**, NOSQL Based Database
- **MATLAB**, Image Processing ToolBox

Miscellaneous Tools

- **Microsoft Office**, Office Productivity Suite
- **Bizagi**, Business Process Modelling Tool
- **GIMP**, Open Source Image Editing Suite
- **UxPin**, Web Based Low Fidelity Prototype Design Suite
- **Operating Systems**, Unix/Linux, Windows

Qualities

- **Good Software Engineering Skills**
- **Good Analytical, Problem-Solving and Communication Skills**
- **Eagerness to Learn and Develop New Skills**
