ANKIT SRIVASTAVA

+91-9553734286
Ankitsrivastava.0686@gmail.com

Senior Automation Engineer

- 4+ years' experience of Leading Automation team to provide end to end automation for (a networked embedded device) Polycom's VoIP phones (build upon Linux and Android OS).
- 2 years of Teaching experience in Computer Science.
- Ensuring Test Driven Development of SIP endpoints in VoIP ecosystem (Skype for business, Open SIP, Genband etc.)
- Planning, Execution and tracking Testing: Smoke Testing, Build Acceptance Testing, Regression Testing, Unit Testing, Functional Testing, Sanity Testing, Stress Testing, Performance Testing, Integration Testing, Release Qualification Testing, Certificate Qualification Testing etc.
- Following Agile, Scrum and Waterfall development methodology for solution development.
- Doing feasibility analysis of automation of feature of Polycom phone.
- Solving problems for faster and accurate results for Automation execution.
- Enhancing/reviewing/fixing Automation Framework enhancement/changes/issues.

TECHNICAL SKILLS

- **Languages:** C/CPP, Perl, Gherkin, C#, Java, XML, HTML, Python, PL/SQL, Shell scripting, Batchfile Scripting.
- **Dev Tools:** SVN, GDB, vim, Crucible, Activestate Komodo, SpecFlow, Source Insight, GitHub, Visual Studio, eclipse, Jenkins, Wireshark, WFTP, WinSCP, Putty.
- **Planning/ Tracking Tools:** JIRA, Workday, VSTF (Visual Studio Team Services), Confluence, Polytest, Excel
- **RDBMS:** Oracle, MYSQL, SQL Server.
- **Web application:** IIS, Apache, Selenium.
- **Database Tools:** Toad, Erwin, Sql developer
- **Hardware:** Embedded IP Phones, Hub, Switch (POE, Non-POE), Cisco Managed Switch, RAID, HP
- **O/S:** Windows, UBUNTU, Red Hat, UNIX, Linux, Android.
- **Performance:** Parallocity, Intel V Tune Performance Analyzer, Klocwork.
- **Communication Tool:** Skype for Buisness, Microsoft Teams, Slack, Cisco Webex, Google Docs.

PROFESSIONAL EXPERIENCE

Senior Software Engineer	Polycom Technology	July 2013 – Present
---------------------------------	---------------------------	----------------------------

Projects Accomplished:

- **Virtual Skype for Business Client:**
 - Architected the Automation Solution using High Level Design (Unified Modeling Language, UML) and Low Level Design (Class Diagram).
 - Implemented the virtual client using UCMA (Unified Communications Managed API, C#) library.
 - Created library (Hash Map, dictionary) for managing Multithread handling of Virtual clients.

- Created logging services for communication with client (Validation/Debugging purpose).
 - Implemented Web Based Services (C#, Get and Post HTTP request) and hosted it through IIS (Internet Information) server.
 - Created support in Test Automation Framework (Perl/Python) for the utilization of services as a client.
- **CallAction on Polycom Phone:**
- Developed API based upon Push (HTTP request, Server) for managing Call related (Initiate, Terminate, Answer, Reject, Hold, Resume, Transfer, Escalate to Conference, Forward) functionalities on phone (C / CPP, Unix, Linux).
 - Developed Security mechanism (Authentication based) for deploying these API.
 - Created a (Graphical User Interface) GUI for deploying API (Perl) as a client.
 - Created Support in Test Automation Framework (Perl/ Python) for deploying the service as a client.
 - Creating of test suit (Including functionality, negative, stress, performance testing) for
- **Event driven Testing framework:**
- Active participated in development of Telephony notification support on Polycom phone (C/ CPP).
 - Developed Daemon service for listening to telephony events (Perl)
 - Created support in Test automation framework for handling events and sending piggyback response(Perl/Apache).
- **Automation of Skype For Business Server:**
- Implementing Interface to execute PowerShell commands (Shell Scripting, C#).
 - Implementation of Deployment of Server tools (SefaUtil, Logging Service etc.) as a web services.
 - Created logging services for communication with client (Validation/Debugging purpose).
 - Created support in Test Automation Framework (Perl/Python) for the utilization of services as a client.
- **SPTF (Skype for Business Partner testing framework):**
- SPTF is an automation framework for 3PIP qualification of Polycom Endpoints (Phones) for Skype For Business support (C#, .Net, WCF).
 - This is a partnership project with Microsoft tracked on VSTF (Visual Studio Team Services).
 - Implemented Polycom endpoint support for automation (C#, get, post, ftp, PowerShell, batch file, piggyback response, event driven architecture, REST API).
 - Distributing the execution effort and triggering automatic execution cycles (Jenkins, Windows Scheduler, NUnit Task).
 - Led the team for driving successful qualification of Polycom audio/video endpoint model for various builds (Release, maintenance and Beta).
- **Installation of Skype for Business Server:**
- Hosted Windows machine using vSphere and Hyper-V.
 - Hosted Lync Services in the form of windows services in the machine.
 - Installed logging tool like OCS Logger on Front End Servers.
 - Configured Firewall, Network Proxy rules, DHCP rules, DNS setting on the server machine.
 - Connected various server as per the SFB Topology.

- **Log Analyzer tool:**
 - Reads the sip signaling diagram corresponding to call (Packet Capture, app logs, C\C++).
 - Automatic report generation of Test execution (tagging similar issues).
 - Generating communication report for Inter Process Communication (IPC) among modules.
 - Automated Construction the pictorial representation for signaling flow (Perl).
- **Test Automation Framework:**
 - Leading Automation team for developing, optimizing and maintaining the framework/scripts to test Polycom endpoints (Perl, Python, C#, SQL, Java, Selenium).
 - Writing test cases and providing automation support for various phases of Testing of Polycom Solution (Embedded Device).
 - Writing tools for execution, managing logs, report generation of required for Quality Assurance (QA) of Solution.
 - Distributing the execution effort and triggering automatic execution cycles (Jenkins, Windows Scheduler, JUnit Task).
- **Others:**
 - Active participation in the strategy planning, execution and monitoring for ensuring growth of team and organization.
 - Maintaining/enhancing labs for automation execution: include setting network topology, physical logical arrangement of endpoints in suits for as per automation requirement, updating the information in database (SQL).
 - Automating the tracking process such as periodic status report generation, timesheet generation and reporting on appropriate platform.
 - Providing training/demo sessions for inter and intra team development.
 - Maintaining company norms while working in partnership projects.

Achievements:

- Star Awards-Bravo award for extra ordinary performance in SPTF project.
- Filed Invention Discloser: Auto Personalization of phone.
- Filed Invention Discloser: Sync between mobile phone and Polycom phone.
- Actively participation in 2 Hack-a-throne events in Polycom.
- Actively participation in 1 Idea-throne event in Polycom.

Software Engineer, Intern	Cisco Systems India Private Limited	Jan 2013 – July 2013
----------------------------------	--	-----------------------------

IKEv2 for VPN:

- Implemented multithreading for IKEV2 protocol for VPN Scaling (Worked in Linux Kernel, Language used C\C++).
- Implemented library (ternary search tree) for maintaining the session ID.
- Tested the performance of solution using Strongswan tool.
- Created case based study for conditions responsible for performance optimization of VPN tool.

Lecturer	Greater Noida Institute of Tech.	July 2009 – July 2011
-----------------	---	------------------------------

Subjects Thought:

- Data Structure, DBMS, Computer Architecture, Discreet Mathematics, Operating System, C/C++, Java.

EDUCATION

Hyderabad, India	BITS Pilani, Hyderabad Campus	Year 2011 – 2013
-------------------------	--------------------------------------	-------------------------

- M.E. in Computer Science, CGPA: 8.26.

Ghaziabad, India	Raj Kumar Goel Institute of Technology	Year 2005 – 2009
-------------------------	---	-------------------------

- B.Tech. in Computer Science and Engineering Department, 67%.

ADDRESS

- Present Address: Flat no. 103, Daffodil block, Bhanu Township, hafeezpet road, Allwyn x road, seri lingampally mandal, Ranga Reddy District, Hyderabad, Telangana State, Pin-500049
- Permanent Address: 46/1A, Jail Road, Rajendra Nagar, Sultanpur (U.P.), Pin-228001
