PROFESSIONAL SUMMARY

- ❖ **7+ Years of industry experience in the area of Software Testing (Manual, Web Services and Automation).**
- ❖ Expert in **Manual and Web Services (SOAP & RESTful)** testing.
- ❖ **Working for production and customer support to debug the issues and provide logs in Jmeter and even testing manually.**
- ❖ Hands on experience in **Functional & Performance testing using JMeter.**
- ❖ Hands on experience in analysing **root cause of live issues and sends response accordingly.**
- ❖ Basic exposure in **Java Programming, Selenium WebDriver, JUnit and TestNG.**
- ❖ Hands on experience in methodologies like **Agile and Scrum.**
- ❖ Exposure in writing Test cases using Element locators, WebDriver methods, Java programming features and TestNG Annotations.
- ❖ Experience in executing **Selenium Test Cases and reporting defects.**
- ❖ Decent experience in Database and Pen (OWASP) testing.
- ❖ Well acquainted with all phases of **SDLC and STLC.**
- ❖ Hands on experience in mobile testing for **Qualcomm on GSM/GPRS/3G/CDMA** models.
- ❖ Participated in project review meetings and Audits (ISO, ISMS and CMMi).
- ❖ Active in all scrum ceremonies and acted as proxy scrum master.
- ❖ Expert in analysing user stories, **Test Estimations** and Test strategy implementation and creating test cases.
- ❖ Excellent document skills and Capable in creating test artefacts like the test data, data validation as a part of test execution.
- ❖ Played **Lead Quality Assurance** role.
- ❖ Having basic exposure on **Micro Services.**

TECHNICAL EXPERTISE

Functional Testing Tool	Manual Testing, Jmeter, QTP, Bridge Test and Selenium.
Defect Tracking Tools	Bugzilla, JIRA
Web Service Tool	Soap UI (4.5.0), JMeter (RESTful API Services)
Test Management Tool	Quality Center, JIRA, Wiki (Confluence) and ALM

Operating System	Windows7, 8, XP, 2k, Android, MAC, Unix.
Languages	C, C++, Java, HTML, VB Script, PERL
Database	Oracle, SQL
Configuration Management Tool	Visual Source Safe (VSS), CVS, Source Tree and SVN, GIT, Maven

PROFESSIONAL EXPERIENCE		
Company	Designation	Duration
ValueLabs LLP Ltd	Quality Analyst	Aug'2012 to till date.
SP Software Pvt Ltd (CMMi – Level 3)	Team Lead	March 2010 to Aug'2012.

EDUCATIONAL QUALIFICATION
- Master of Computer applications from IGNOU University. - BSc (Computer Science) from Andhra University.

PROJECT DETAILS
Project #1

Project Name	Symphony7
Tools & Technologies	Core Java, Spring 3.1, Spring JDBC, Restful Web services, Junit, STS, Glassfish 3.1 and MS SQL Server, ESB (WS02)
Platform	Windows
Testing Approach	Manual, Web Services and Automation
Web services testing tools	JMeter, Soap UI
Test Management tools	Jira & ALM
Regression testing tool	Selenium, GIT, Maven, Junit
Environment	Windows 7, Windows-xp, Mac
Methodology	Agile
Duration	2013'Oct to till date

Team Size	8
-----------	---

Project Description:

Symphony is a complete job/product tracking system. This is core functionality as Admin can create required format dynamic job templates as per user and domain specification. It is designed to use location specific and site specific. It provides the following:

- Role based management system.
- job/template creation
- job/template versioning
- job routing and recall
- aggregation of multi-location view
- job monitoring and allocation
- Cost analysis for each job
- data ingest

Roles and Responsibilities:

- Participating in daily scrum calls.
- Understanding the requirements from the initial stage, taking clarifications with client.
- Preparation and execution of testcases for manual and API.
- Test the restful API's for different response codes.
- Involved in all Phases of project from Analysis to Defect Reporting in time.
- Defect tracking in Jira and sent the consolidated bug reports
- Performing API testing
- Performed database testing for ingesting.
- Enhanced Test cases using Java programming features and TestNG Annotations.
- Execution of Selenium Test cases and Reporting defects.
- Conducting Data driven testing, cross browser testing and parallel test execution.
- Proactively taking responsibility of consolidating API regression pack each sprint wise by collecting jmx files from rest of the teams of symphony.
- Tracking status and occupancy mails
- Giving demo to symphony clients at the end of each sprint.
- Participating in retro meetings
- Preparation of post mortem reports.
- Execution of regression pack developed in Selenium and share test results.
- Supporting other teams of Tagcmd for execution of regression packs in pre-production and live environments.

Project #2

Project Name	ASDA Stars.
Tools & Technologies	Net , JQuery, SQL Server2008.
Platform	Windows7 and Mobile: Android and IOS.
Role	Team Member, Partial Team Lead
Testing Approach	Manual, DB, web services, Mobile and pen testing.
Web Services testing tools	Soap UI
Test Management tool	Jira

Client	River Marketing
Duration	2013'May to Sep'2013

Project Description

ASDA is part of the Wal-Mart family and occupies the number 2 position in UK grocery retailing. They also hold a leading position in the UK clothing market with their George clothing brand, and are making increasing inroads into the UK's General Merchandise sector. They have over 180,000 colleagues in Stores and Depots and 3,700 Home Office (HQ) colleagues. This application helps ASDA employees nominate their colleagues for awards and points would be credited to nominee's account. The nominee's can redeem their points by purchasing wish list items, and also employees can communicate each other by wall posts and comments like Face book. Employees can send Ecards and birthday wishes to others colleagues and displaying the same on respective person's wall and home screen.

Roles and Responsibilities:

- Understanding the Business Requirement Specifications.
- Designing Test Cases, Execution of the test cases and reporting the bugs.
- Conducted Functional testing with Valid and Invalid inputs for positive and negative testing.
- Communicates with Functional Analyst on any issue clarifications.
- Preparing Defect report as per severity and priority Active participation in Bug triage meetings.
- Modifying the Tests and Conducting Regression Testing.
- Participation in Test Closure activities.
- Participation in Client's 'Business Operations' Study.
- Requirements Streamlining along with Project Management.
- Performed data base testing using SQL commands.
- Writing SQL commands for back end testing.
- Performed Soap UI testing
- Tracking status and occupancy mails
- Performed responsive testing on different mobiles

Project #3

Project Name	Express Banking Client.
Tools & Technologies	J2EE, Bridge Test, VB.Net.
Platform	Windows-XP
Role	Automation engineer
Testing Approach	Automation
Tool used for Automation	Bridge Test
Test Management tools	Quality Center
Bug Tracking Tool	Jira
Client	NCR Corporation India Ltd.
Duration	2012'Aug to Apr'2013

Project Description

NCR is at the centre of the **self-service revolution**, strategically poised between consumers who demand fast, easy and convenient options, and businesses intent on increasing revenues, building customer loyalty, reaching the contemporary consumer and lowering their cost of operations.

Roles and Responsibilities:

- Played the role of a Sr. Test Engineer in Express Banking Client.
- Involved in Domain Training about the projects
- Involved in Creation of Test scripts using Bridge Test Tool(Client Specific Tool)
- Involved in Raising GRTIs(Issues) and raised critical Defects during automation
- Prepared Sanity Test suites, Regression Test Suites and successfully executed the test sets on need basis.
- Involved in all Phases of project from Analysis to Defect Reporting in time.
- Successfully re-used existing test cases for new implementation's in the product.

Project #4

Project Name	Android 2.3 & 4.0
Client	QUALCOMM
Duration	Aug 2011 to Aug'12
Testing Approach	Manual and Automation
Automation tool	Perl
Role	Team Lead
Environment	ANDROID OS, JAVA, LINUX, PERL.
Handset	FFA-7x27.
Flashing Tools	Trace 32, QPST
Other Tools	ATM, QXDM and Crash Man.
Bug tracking tool	JIRA

Project Description:

This Project involves testing the stability of Modem in the device, which supports Android OS for Single and Dual Mode Phone. The QUALCOMM Test Suite is a set of tests which tests the base functionality of Android OS based device and tests the file system and related functionality, Multimedia framework is designed to allow playing and recording of audio and video data from a wide range of inputs. Personalize your phone with a series of apps to suit you, from Google Earth, news and weather apps, to Graphics and your favourite apps YOUTUBE. Testing all the applications using GPRS, WCDMA, CDMA and Wi-Fi Networks.

Roles and Responsibilities:

- Handling a team of 10 members and planning daily activities.
- Worked as a Lab in-charge and maintaining daily strategies and submit reports to management and client.
- Feasibility study if the test cases to automate, preparation and execution of scripts with rule set.
- Preparing and Executing Test Cases for Phone Calls, SMS, Bluetooth, Settings (Screen timeout, APN Settings, and Touch Calibration), Audio, Video, FM Radio, Browser, Graphics (Neocore), YouTube, and Airplane mode, PLMN Search, WIFI Scenarios, Camera and Camcorder.
- Testing the Single Sim phone with different network technologies (WDCMA, GPRS and CDMA).
- Testing the Dual Mode phone with different network technologies (W+G, G+G and C+G).
- Data Call, Concurrency with Data Call and apps, USB Hub Configuration Test.
- Perform **Sanity, Stress and Stability testing**.
- Reporting the Crash (Bug) through JIRA.
- Verification of the fixed Crash through engineering builds given by developers.
- Preparation of Daily, Weekly, Monthly Reports.
- Keep tracking of the Lab Assets.
- Communication with the client as when required.

Project #5

Title	Dhanwantri (Health care govt. of India ESIC hospitals)
Client	Wipro Technologies
Environment	C#, Asp.Net3.5, ADO.Net, Visio, WSCF, WSSF AJAX, Reports, MySql 5.0
Testing	Manual, DB.

Project Description:

ESIC (Employee State Insurance Corporation) is one of the largest Insurance Corporation in India, which provides healthcare facility to all Insured patients. This project belongs to health care domain, which has following two modules Blood bank and Mortuary Module.

Roles and Responsibilities:

- Understanding the requirements from the initial stage, taking clarifications with client.
- Preparation and execution of test cases.
- Preparation of Requirement traceability matrix based on the module wise requirements.
- Distributing work among team and updating progress by end of the day.
- Defect tracking in Jira and sent the consolidated bug reports
- Performed SQL injection for client specified scenarios.
- Tracking status and occupancy mails sending across the team.
- Preparation of post mortem reports and ISO audit related reports.
