Blog: www.sspoeticnostalgia.com

Permanent Address: H.No.492, Sector-16, Faridabad

Profile summary

A computer science graduate with strong analytical skills, an internship experience in market research and strategy formulation for a global technology giant and multiple academic projects in technology and data science. Extremely strong writing and communication skills. Looking forward for opportunities in market research, management consulting, technology strategy and/or data science.

Educational qualifications

- B.Tech. in Computer Science and Engineering from Jaypee Institute of Information Technology, Noida (2015 - 2019) – 7.1 CGPA
- XII standard from Modern Vidya Niketan School, Faridabad (2014 - 2015) – 91%
- X standard from St. Albans School, Faridabad (2012 - 2013) – 10 CGPA

Previous Internship

At **NEC, India**

Internship duration: 28 May 2017 – 28 July 2017

The internship involved potential market analysis for companies' key offerings and devices. Further the internship also involved working on business development opportunities and responding to large tenders. Specifically, the following activities were carried out:

- Working of NEC's artificial intelligence devices and solutions was studied.
- Competitive landscape and external business environment was studied through secondary research.
- Key offerings of NEC in artificial intelligence space were benchmarked with those of competitors.
- NEC's target market segments were subsequently analysed.
- An excel model along with a PowerPoint deck was created for the management for undertaking further strategic decisions.
- Participated in responding to large tenders for business development.

List of college projects

1) Genetic Implementation of Round Robin Algorithm (2019)

Description: Most popular scheduling algorithm of the Operating System was given a certain twist. It was accompanied with Genetic theory of Meta-heuristic algorithms.

2) Facial expression detection using Deep Learning (2018)

Description: Predicting the expressions of a person, in the real time, making use of Deep Learning techniques was the aim of this project. Particular data set describing 7 varied emotions was used.

3) Vehicle detection using HoG and SVM (2017)

Description: The project was aimed to develop a Machine Learning system, to identify a vehicle in the given sequence of images, i.e., in a video. It was carried out on the live images too and showed accurate results. Machine learning techniques like Histogram of Oriented Gradients and Support Vector Machine were used.

4) Road detection using Multi-layered Neural Network (2016)

Description: The main aim of the project was to detect a road in a given image. The idea was efficiently carried on the respective data set, making use of the multi-layered neural network. Further, it can be carried on the real time systems.

Software and Programming Skills

- Python
- Image Processing
- C programming language
- Machine Learning
- Genetic Algorithm
- MS Office

Personal information

Fathers Name: Mr. Aniel Sharma

Marital Status: Unmarried

Nationality: Indian

Alternate Number: (+91)9971709854

Hobbies

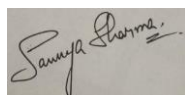

1. Passion for poetry
 - I have been writing poems in both English and Hindi languages, since a young age.
 - Recently created a blog by the name of "sspoeticnostalgia."
2. I was a member of the college Literary Society and was an active participant in the School Debate and Dramatics Club.

Certification

I, the undersigned, certify that to the best of my knowledge and belief, the data provided describes me and my qualifications.

Month & Year: August, 2019

Place: Faridabad
