PROFESSIONAL SUMMARY

Astute Developer with 3.5 years of IT experience, proficient in gathering and defining requirements, planning software development, and optimizing performance with ongoing monitoring and support. Manage new installations and adapted integrations with skill and efficiency. Work well with technical and non-technical personnel to accomplish project targets.

SKILLS

- Ruby
- CSS
- MySQL
- Jira
- Ruby On Rails
- AJAX
- Postgres
- HTML
- JavaScript
- GitHub

EXPERIENCE

Senior Software Engineer

December 2024 - Current

Ideyalabs | Hyderabad, Telangana

- Implemented system enhancements according to client requests or industry trends.
- Debugged and resolved technical problems that arose during development.
- Reviewed test results to ensure accuracy of implemented solutions.
- Provided training to end-users on newly implemented systems or features.
- Evaluated existing systems to identify areas for improvement or upgrading.
- Facilitated communication between end-users and development teams.

Associate Software Engineer

May 2022 - November 2024

OSI DIGITAL PVT LIMITED | Hyderabad, Telangana

- Helped improve system performance by reviewing current processes and recommending improvements
- Scheduled updates for system equipment and devices with minimal downtime
- Reviewed test results to ensure accuracy of implemented solutions
- Debugged and resolved technical problems that arose during development
- Facilitated communication between end-users and development teams
- Optimized systems with well-defined operational, technical and support requirements
- Produced clean, error-free code to meet aggressive timelines
- Involved in the architecture, development and maintenance of applications
- Involved in server-side templating languages like SLIM
- I was involved in writing test cases using Rspec for the implemented enhancements/development

- Involved in Sprints to discuss the development of the application
- Coordinate with QA for testing, Production releases, Application deployment, and integration
- Involved in debugging and Writing JavaScript code
- Involved in taking backups of the database
- Introduced version control best practices with Git, improving code collaboration and traceability

Project Associate Trainee
OSI DIGITAL PVT LIMITED | Hyderabad, Telangana

August 2021 - April 2022

EDUCATION

Batchelor Of Technology - Computer Science and Engineering
Lendi Institute of Engineering and Technology, Visakhapatnam

June 2021

PROJECTS

Cryoport Systems Inc. is a web application which provides services like end-to-end logistics that take customers' orders and provide the necessary Shipper, Dewar (Cryogenic), Smartpak, and Ancillary materials and maintain the customer's required temperature specifications during shipment.

Roles and Responsibilities :

Involved in the architecture, development and maintenance of applications.

Involved in server-side templating languages like SLIM.

I was involved in writing test cases using Rspec for the implemented enhancements/development.

Involved in Sprints to discuss the development of the application.

Coordinate with QA for testing, Production releases, Application deployment, and integration.

Involved in debugging and Writing JavaScript code.

Involved in taking backups of the database.

Introduced version control best practices with Git, improving code collaboration and traceability.

Quickcard is a web application that enables users to create, customize, and share digital business cards effortlessly. It offers a wide range of templates, allowing professionals to design personalized cards that can be shared via QR codes or links. The platform integrates with contact management systems for seamless networking and easy data storage. Quickcard ensures secure access and sharing of business card details, promoting a paperless and eco-friendly approach.

Roles and Responsibilities:

integrated third-party APIs into applications to enhance functionality and deliver seamless user experiences.

Implemented advanced blockchain solutions within applications, transitioning from Sequence Blockchain to Hyperledger Fabric (HLF) Blockchain.

Coordinated closely with the Quality Assurance (QA) team to create and validate test case scenarios, ensuring thorough application testing.

Engaged with customers to understand and analyze their specific business requirements.

Developed comprehensive test cases using RSpec to cover various test scenarios.

Ensured application reliability and stability by performing unit testing, integration testing, and regression testing.

ACHIEVEMENTS

- Got Appreciation from the client for completing critical tasks.
- Played a key role in training and mentoring new team members, resulting in improved onboarding and increased team productivity.
