

Nishanth Mosam

Software Engineer

Profile

I am having 10+ years of experience and relevant on ruby on rails and front end technologies like javascript, jquery, react.

Employment History

Senior Software Engineer at docyt, JAIPUR

June 2024 — June 2025

Docyt, pronounced “docket”, is a bundled, integrated, AI-powered accounting automation software platform. Docyt AI’s super power is enabling much faster decision making. Because it digitizes financial data, automates workflows, and continuously reconciles the books, you get real-time accounting. It also reduces the cost and technical complexity of bookkeeping and back-office tasks for businesses and their accountants

Versions: Ruby: 3.0, Rails: 6.2, python: 3.13.0

Roles: Integrated Gary(AI) agent for auto verification of invoices
Integrated Inter Account transfers between the payment accounts through dwolla
Product enhancements
Doing the spike for the rollbar tickets and fixing the bugs
Monitoring the product for the rollbars
Assisting the junior developers

In docyt_bot using python and rabbitmq messaging server, I created a messaging event to subscribe to it and interacted with google AI to extract the information from the invoice uploaded by the user and publish the information to the event subscribed by the rails application.

Senior Software Engineer at global logic, Hyderabad

May 2021 — December 2023

The project I was working on is jibe, it is into the recruitment domain, we handle the the transition of hiring of employees from step1 to onboarding, we worked for couple of clients like fedex, JNJ, comcast, 7eleven.

Versions: ruby: 3.0

Roles:

My role in the company was to handle both the Apply and Non Apply work i,e under Non Apply handle the import of jobs and ensure that the jobs are imported successfully from various ATS of clients,

We have clients like JNJ, Fedex, Siemens Global, 7-eleven and many more, I used to ensure that if any job imports for the clients are failed, analyse them, fix the root cause of it.

I also used to enhance the functionality of the jobs like the display content, changing the questions and also the answer options, make a
