| RoboHelp          | MS Office | Zendesk      | Flare |        |
| Snagit            |           |              |       |        |

### PROJECTS

#### DevX Platform

06/2024    Hyderabad, India

The **DevX Platform** is an internal application designed to enhance the developer experience by streamlining CI/CD processes, automated testing, and API integrations.

- Developed API documentation, user manuals, and installation guides for internal developers and system administrators.
- Collaborated with product and engineering teams to document complex system behaviors, integration points, and testing workflows.
- Created release notes to outline new platform features and updates.

#### Salesforce Application

03/2019    Bangalore, India

This project involved documenting the implementation and integration of **Salesforce CRM** for managing customer relationships, sales processes, and marketing workflows.

- Created comprehensive user guides, API documentation, and admin manuals for Salesforce users and administrators.
- Worked closely with Salesforce developers to document custom modules, workflows, and integrations within the Salesforce ecosystem.
- Delivered integration guides for connecting third-party tools with Salesforce, enhancing user comprehension and reducing onboarding time.

### TRAININGS

#### Post Graduate Diploma in Technical Writing in Business Management

Symbiosis Centre for Distance Learning (India)
