Education

BE - Information Science & Engineering 2011-2014

B V Bhoomaraddi college of engineering,
Hubli, karnataka

M.Tech - Computer Science & Engineering

PES College Of Engineering
Mandya, karnataka 2015 – 2017

Experience

Software Engineer May,2018 – Jan,2021

Engagedly software india Pvt. Ltd.

Software Engineer Feb,2021 – Aug,2022

Amzur infotech Pvt. Ltd.

Senior software engineer Aug, 2022 – Jan,2026

PowerSchool india Pvt.Ltd

Career Summary

Around 7.6 years of diversified experience in the IT industry as a Senior Software Engineer, specializing in Web Application Development, Backend Systems, Frontend Architecture, AI-driven Solution, and Secure Coding Practices.

- Hands-on Experience in developing and implementing web application using **Ruby On Rails, Rest Api Development, MVC Architecture, Object-Oriented Programming(OOP), React.js, TypeScript**, Jquery, PostgreSQL and MySql
- Experience in building scalable and type-safe frontend application using TypeScript, including interface design, strict typing, reusable components
- Experience in Background processing with Delayed Job, Sidekiq
- Experience in developing and implementing **Rest API and GraphQL Integration**
- Extensive experience working with MVC architecture using Ruby on Rails
- Maintained minimum 95% test coverage using RSpec and performed API testing using Postman
- Experience in application **security remediation**, where:
 - Analyzed security vulnerabilities raised by QA/Security teams
 - Replicated reported issues using **Brup Suite** for request/response
- Hands-on experience in integrating AI-powered feature using **ChatGPT (OpenAI APIs)** including resume parsing and document/image data extraction

Key Skills

Knowledge of

Back-end

- Ruby
- Ruby on Rails
- Rest Api Development
- GraphQL
- MVC Architecture
- Object-Oriented Programming(OOP)
- Delayed job, Sidekiq
- Rails Caching, Redis
- Devise, JWT Authentication
- Rspec

Database

- PostgreSQL/MySQL
- ActiveRecord
- Database Design & Optimization

Front-end

- React.Js
- React Context
- Typescript
- Javascript
- React Native CLI
- Tailwind CSS
- Jquery
- HTML, CSS, JSON, AJAX

Security Testing Tool

- Burp Suite

Continuous Integration Tool

- GitHub Actions

AI Integration and Tool

- ChatGPT(OpenAI APIs)
- Image Data Extraction(OCR-based)
- Resume Parsing Automation
- Cursor Agent, GitHub Copilot

Key Competencies

- Ability to work under pressure
- Self-Motivation
- Conflict Resolution
- Adaptability
- Time Management
- Eager to learn
- Quick learner

- Knowledge exposure in **mobile application development** using **React Native CLI, RTK Query, and GraphQL**, with understanding of **monolithic mobile app architecture**
- Knowledge exposure in **CI/CD pipelines** using **GitHub Actions**
- Good expertise in **Git** for version control

PROJECTS SUMMARY

Product Name: HigherEd (Powerschool)

Domain: Education(K-12)

Technology: Ruby on Rails, Rest APIs, GraphQL, JSON and Mysql, React.js, TypeScript

Tools Used: Jira, GitHub, Figma

Role: Senior Software Developer

Developed a comprehensive K-12 education management platform designed to support students, teachers, and parents through a unified application. The system enables role-based access for managing academic activities such as classes, attendance, assignments, and assessments. Teachers can track student performance and communicate academic updates, while parents can monitor progress and attendance in real time. The platform streamlines administrative workflows and improves transparency between schools and families. It supports secure data management and scalable operations across institutions. The solution enhances collaboration, efficiency, and overall learning experience.

Product Name: Eteki.com

Domain: HR

Technology: Ruby on Rails, API, JSON, ES and Mysql.

Tools Used: Jira, GitHub, Basecamp

Role: Software Developer

Worked on a technical interview management platform that enables organizations to conduct structured, expert-led interviews for evaluating engineering candidates. The system supports end-to-end interview workflows, including interview scheduling, expert assignment, candidate assessment, and detailed feedback reporting. It helps companies reduce time-to-hire by providing quick and unbiased technical evaluations. The platform improves hiring accuracy and consistency by standardizing interview processes. Designed to support remote interviews and scalable hiring needs across multiple technologies and roles

Product Name: Engagedly

Domain: HR

Technology: Ruby on Rails, Backbonejs, HAML, SCSS, Rest API, JSON, JQuery, AJAX, Bootstrap and PostgreSQL.

Tools Used: Jira, Bitbucket, Basecamp

Role: Software Developer

Worked on a comprehensive talent management platform designed to help organizations optimize employee performance, engagement, and development. The system enables continuous performance reviews, goal setting (OKRs), real-time feedback, 360° multi-rater assessments, and structured evaluation cycles. It provides tools for employee engagement, rewards and recognition, and learning and development to foster a high-performance culture. The platform streamlines HR processes, enhances alignment between individual goals and organizational objectives, and delivers actionable insights through analytics and feedback mechanisms. It supports efficient talent assessment, career growth planning, and employee engagement across teams.

Declaration:

I declare that the above stated information and facts are true and correct to the best of my knowledge.
