Summary

Software Engineer with 2.7 years of experience developing scalable applications using Ruby on Rails and React.js. Strong in building and integrating RESTful APIs, Stripe payment gateways, and delivering end-to-end features. Proven at owning features end-to-end, collaborating directly with clients, and delivering reliable solutions in Agile environments.

Skills

Frontend: React.js, JavaScript(ES6+), HTML5, CSS3, Context API, Redux

Backend: Ruby, Ruby on rails, RESTful APIs, MYSQL

Tools & Skills: Git, AWS, Agile, Vite/Webpack(basic), TypeScript(basic), Debugging, Code Reviews

Experience

Software Engineer Intern | Ruby on Rails

February 2023 – April 2023

- Built an end-to-end application using **Ruby on Rails**, integrating **5+ REST APIs** to simulate real-world production workflows.
- Gained hands-on experience in **MVC architecture, routing, and database design** using Ruby on Rails.
- Collaborated with the development team to **fixing bugs, testing features, and maintaining technical documentation**, improving overall team productivity.

Projects

Software Engineer - Vyshnavi Information Technologies (India) Pvt. Ltd, Bengaluru

Online Fundraising Platform | React.js, Ruby on rails, MYSQL, AWS

August 2023 – October 2025

- Contributed to a scalable **online fundraising and payment platform** serving **100K+ users**, optimizing donation flows and payment processing, resulting in a **20% increase in conversion rates** and improved user engagement across multiple channels.
- Implemented secure **Stripe payment gateway workflows**, including payment validation, transaction handling, and error management, supporting **1000+ monthly transactions** with high reliability.
- Created dynamic, **reusable UI components** using React.js, JavaScript (ES6+), and React Hooks, improving engineering efficiency by **30%** and ensuring a scalable, maintainable architecture with strong cross-device usability.
- Developed **RESTful APIs** using **Ruby on Rails** to support core modules such as Finance, Dashboard, and Admin, enabling seamless frontend integration and scalable application performance.
- Debugged backend systems using Ruby on Rails by analyzing logs, monitoring background jobs, and **resolving API and database issues**.
- Analyzed existing modules and performed impact analysis to deliver scalable **backend enhancements**, while managing database schema changes using Rails migrations and optimizing data handling with ActiveRecord.
- Participated in **sprint planning, code reviews**, and cross functional to deliver features on time in an **Agile environment**.

Warehouse Management System | React.js

November 2025 – February 2026

- Engineered the **Movement by Road module** within a large-scale Warehouse Management System, enabling seamless inter-depot commodity transfers across **1,900+ warehouses**, reducing manual coordination efforts by **30%**.
- Designed **responsive React-based UI screens** for road movement operations, handling **source-to-destination transfers**, including shipment creation, dispatch, and receipt workflows, improving user efficiency by **35%** and reducing data entry errors by **25%**.
- Streamlined **inter-depot commodity movement operations** by enabling **real-time tracking** and status visibility

Certifications

- **AWS Certified Cloud Practitioner– Amazon Web Services (2023):** Completed Demonstrated Foundational Knowledge of cloud concepts, AWS services, security, and pricing models

Education

Bachelor of Technology(BTech)-CSE

Graduated: 2023

Swarnandhra College of Engineering and Technology, Andhra Pradesh

CGPA: 8.59 / 10
