PROFESSIONAL SUMMARY

- Ruby on Rails Developer with 3+ years of experience building scalable web applications using Ruby on Rails, React.js, and PostgreSQL. Skilled in background job processing with Sidekiq, API integrations, and performance optimization. Strong understanding of MVC architecture and RESTful design. Passionate about writing clean, maintainable code and collaborating in agile teams.

TECHNICAL SKILLS AND INTERESTS

Languages: Ruby, JavaScript, Python

Frameworks/Libraries: Ruby on Rails, React.js, Hotwire, Stimulus

Databases: PostgreSQL

Tools: Docker, GitHub Actions, Redis, Sidekiq, RSpec, Ubuntu, Heroku, JIRA

Web: HTML, CSS, REST APIs

Concepts: MVC Architecture, API Integration, Active Record, Devise, CI/CD

Soft Skills: Problem Solving, Team Collaboration, Adaptability.

PROFESSIONAL EXPERIENCE

Vrinsoft Experience Technology

Aug 2025 - March 2026

Software Developer, Ahmedabad

- * Integrated AWS Cognito for authentication, replacing Rails-based user management and improving application security and scalability.
- * Managed multiple environments and servers to ensure scalability and high availability.
- * Optimized Rails application performance and resolved critical production issues.
- * Monitored and debugged production errors using Sentry, reducing system failures.
- * Built and maintained CI/CD pipelines using GitHub Actions for automated testing and deployment.

SR Next

Dec 2024 - April 2025

Software Developer, Indore

- * Delivered full-stack features using Ruby on Rails and React.js, improving application functionality and user experience.
- * Built reusable and optimized UI components, improving frontend performance.
- * Wrote RSpec test cases to improve code quality and reduce production bugs.
- * Collaborated with cross-functional teams to deliver scalable features on time.

Backbenches Technologies

Sep 2022 - Sep 2024

Software Developer, Indore

- * Started as a Junior Developer and progressed to handling backend feature development using Ruby on Rails.
- * Developed scalable backend features and implemented CRUD operations using Ruby on Rails and PostgreSQL.
- * Integrated third-party APIs and implemented background job processing using Sidekiq & Redis.
- * Optimized database queries and improved application performance.
- * Collaborated in team environments, followed Git best practices, and contributed to CI/CD workflows.

PROJECTS

Tyrenet UK

Customer-facing mobile tyre fitting platform for roadside replacements across UK

x

- * Developed core features for tyre specification input (width, profile, load, rim, speed), geolocation-based matching, and fitter dispatching using Ruby on Rails.
- * Handled third-party APIs for real-time tyre availability, supplier sync, and inventory management, across multiple portals.
- * Designed and worked on multi-service Rails architecture for order processing, geolocation, and notifications.
- * Optimized Sidekiq jobs and database queries to efficiently handle high-volume order processing.

EDC Forge

Worked on a CRM tool to manage data for small-scale organizations

- * Developed and maintained core CRM modules including projects, companies, contacts, tasks, notes, and boards.
- * Implemented data relationships, validations, and business logic using Ruby on Rails.
- * Built dynamic and responsive user interfaces using React, Webpacker, Bootstrap, and Select-picker.
- * Applied Ruby meta-programming to design flexible models and reusable forms.
- * Worked on retention tracking and reporting features to support data-driven decisions.

Mailcoaster - Email Marketing Platform

An email marketing platform designed for sending bulk emails and documents efficiently.

- * Developed an email marketing platform using Ruby on Rails, Hotwire, and Stimulus for managing email campaigns and templates.
- * Implemented bulk email sending, campaign scheduling, and SMTP tracking features.
- * Designed scalable background processing using Sidekiq and Redis for asynchronous workloads.

IDEO(Spec India) - Project Portfolio Manager

A web application enabling individuals to securely store, manage, and share their projects online.

- * Worked on a Rails-based project portfolio management application during initial learning phase.
 - * Implemented basic CRUD features, API integrations, and data handling using Ruby on Rails.
 - * Gained hands-on experience with Ruby fundamentals, MVC architecture, and PostgreSQL.
-
