PROFESSIONAL SUMMARY

- Full Stack Developer with 3+ years of experience in Ruby on Rails and React.js, building scalable web applications for real-world clients. Experienced in AWS Cognito integration, CI/CD pipelines with GitHub Actions, background job processing with Sidekiq/Redis, and RESTful API design. Strong understanding of MVC architecture, Active Record, and agile development. Currently available for immediate joining and open to full-time Ruby on Rails or Full Stack opportunities.

TECHNICAL SKILLS

Languages: Ruby, JavaScript, Python

Frameworks/Libraries: Ruby on Rails, React.js, Hotwire, Stimulus

Databases: PostgreSQL

Tools: Docker, GitHub Actions, Redis, Sidekiq, RSpec, Git, Sentry, Ubuntu, Heroku, JIRA

Web: HTML, CSS, REST APIs

Concepts: MVC Architecture, API Integration, Active Record, Devise, CI/CD, Agile, Scrum

Soft Skills: Problem Solving, Team Collaboration, Adaptability

PROFESSIONAL EXPERIENCE

•Vrinsoft Experience Technology

Aug 2025 – Mar 2026

Software Developer, Ahmedabad

- Integrated AWS Cognito for authentication, replacing Rails-based user management and improving application security and scalability.
- Managed staging and production environments using GitHub workflows, Sentry logs, and AWS logs to ensure scalability, high availability, and proactive issue detection.
- Optimized Rails application performance and resolved critical production issues, improving overall system stability.
- Built and maintained CI/CD pipelines using GitHub Actions for automated testing and deployment.

•SR Next

Dec 2024 – Apr 2025

Software Developer, Indore

- Delivered full-stack features using Ruby on Rails and React.js, improving application functionality and user experience.
- Built reusable and optimized UI components, improving frontend performance and reducing load time.
- Wrote RSpec test cases to improve code quality and reduce production bugs.
- Collaborated with cross-functional teams in an agile environment to deliver scalable features on time.

•Backbenches Technologies

Sep 2022 – Sep 2024

Software Developer, Indore

- Progressed from Junior Developer to independently handling backend feature development using Ruby on Rails.
- Developed scalable backend features and implemented CRUD operations using Ruby on Rails and PostgreSQL.
- Integrated third-party APIs and implemented background job processing using Sidekiq & Redis.
- Optimized database queries, improving application performance and reducing query execution time.
- Followed Git best practices and contributed to CI/CD workflows in a collaborative team environment.

PROJECTS

•Tyrenet UK

Customer-facing mobile tyre fitting platform for roadside replacements across the UK

- Developed core features for tyre specification input (width, profile, load, rim, speed), geolocation-based matching, and fitter dispatching using Ruby on Rails.
- Integrated third-party APIs for real-time tyre availability, supplier sync, and inventory management across multiple portals.
- Designed multi-service Rails architecture for order processing, geolocation, and push notifications.
- Implemented cash and non-cash job workflows with multi-step form and Stripe pre-authorization payment integration for secure and flexible payment processing.

•EDC Forge

CRM tool to manage data and workflows for small-scale organizations

- Developed and maintained core CRM modules including projects, companies, contacts, tasks, notes, and boards.
- Implemented data relationships, validations, and business logic using Ruby on Rails.
- Built dynamic and responsive user interfaces using React, Webpacker, Bootstrap, and Select-picker.
- Applied Ruby meta-programming to design flexible models and reusable forms.
- Worked on retention tracking and reporting features to support data-driven decisions.

•Mailcoaster – Email Marketing Platform

An email marketing platform for managing and sending bulk email campaigns efficiently

- Developed the platform using Ruby on Rails, Hotwire, and Stimulus for managing email campaigns and templates.
- Implemented bulk email sending, campaign scheduling, and SMTP tracking features.
- Designed scalable background processing using Sidekiq and Redis for asynchronous workloads.

•IDEO (Spec India) – Project Portfolio Manager

A web application enabling individuals to securely store, manage, and share their projects online

- Built Rails-based project portfolio management features including CRUD operations and API integrations.
- Gained hands-on experience with Ruby fundamentals, MVC architecture, and PostgreSQL during initial development phase.

EDUCATION

•Bansal Institute of Science and Technology

B.Tech – Computer Science

2019 – 2023

Bhopal, India
