PROFILE

Results-driven Software Developer with 2+ years of experience in designing, developing, and deploying scalable web applications. Proven expertise in backend development, cloud infrastructure, API development, and real-time integrations. Strong problem-solving skills with a passion for clean, maintainable code.

PROFESSIONAL EXPERIENCE

04/2025 – Present
Indore, India

YuvaSoft Solutions pvt. Ltd.

Software Engineer(Ruby on Rails Developer)

- Working as a Ruby on Rails developer on live production projects, building and maintaining scalable, API-driven web applications.
- Collaborating directly with clients through requirement discussions, feedback calls, and feature walkthroughs to deliver tailored solutions.
- Developing and integrating secure authentication, authorization, and role-based access control for real-world business use cases.
- Implementing and optimizing RESTful APIs, database schemas, and backend business logic to ensure performance and reliability.
- Actively involved in deployment, version control, and production support, ensuring smooth releases and timely bug fixes.
- Writing clean, reusable, and maintainable code while following Rails best practices and Agile development workflows.

01/2024 – 04/2025
Indore, India

Gems Essence

Software Engineer(Ruby on Rails Developer)

- Applied best practices in Rails architecture, database design, and code maintainability while working on production-level features.
- Contributed to multiple projects across different domains, collaborating with cross-functional teams to deliver reliable solutions.
- Worked as a Ruby on Rails developer on UC View, an advertising management platform, building and maintaining scalable backend features.
- Implemented real-time data updates and optimized workflows, improving usability and performance for end users.

| • Elasticsearch | • AWS EC2 | • RSpec |
| • S3 | | |

EDUCATION

08/2020 – 04/2024
Indore, India

Bachelor of Technology (Computer Science)
Acropolis Institute of Technology and Research, Indore

PROJECTS

Memora Live

Digital Memorial & Live Tribute Platform

- Built a digital memorial platform enabling families to create and manage tribute events in remembrance of departed loved ones.
- Enabled secure media uploads and storage for photos and videos, helping families preserve and share memories of loved ones.
- Implemented secure user authentication and authorization workflows. Developed a complete API-driven platform from scratch using Ruby on Rails.
- Integrated AWS S3 for scalable and secure media storage. Implemented Stripe payment gateway handling real-world transactions.
- Automated deployments on AWS EC2 using Capistrano, improving release reliability.
- Integrated YouTube Live and Zoom Meetings for real-time live streaming events.

UC View

Smart Digital Advertising & Public Alert Platform

- Worked on a Ruby on Rails-based advertising management system used to control and display advertisements on LED display networks across city locations.
- Implemented logic to override advertisements with important public announcements or emergency news, enabling real-time citywide information broadcasting.
- Built AJAX-driven dynamic interfaces to update ad content and system status without full page reloads, improving operational efficiency.
- Collaborated with stakeholders to understand business requirements and deliver a reliable, real-world advertising solution used in live environments.
