PROFESSIONAL SUMMARY

Fullstack/Backend/Frontend engineer with 3.8+ years building scalable fintech and payments platforms using Ruby on Rails and React on AWS (S3, RDS, Lambda, CloudWatch). Delivered event-driven microservices with Kafka, integrated UPI/PayU/Plural/ICICI, optimized Redis and PostgreSQL for up to 35% latency reduction, and improved success rates by 20%. Strength in BBPS bulk workflows, multi-currency, compliance (TDS/LDC), RBAC/OAuth2/JWT, and production reliability. Strong UI engineering with React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3. Rails expertise with Ruby on Rails, ActiveRecord, RSpec.

SKILLS

Languages/Frameworks: Ruby on Rails, React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

Cloud/DevOps: AWS (S3, RDS, Lambda, CloudWatch), Docker, Git, CI/CD

Data/Events: PostgreSQL, MongoDB, Redis, Apache Kafka

Security: OAuth2, JWT, RBAC, MFA (JumpCloud), API Security Headers

Testing: RSpec, Jest, TDD, Code Reviews, Observability

Domain: Fintech, Payments, BBPS, Spend Management, Reconciliation, Compliance (TDS/LDC)

EXPERIENCE

Senior Software Engineer

Feb 2022 – Oct 31, 2025

Zaggie Prepaid Ocean Services Ltd.

Hyderabad, India

- Built microservices in Ruby on Rails serving 2M+ requests/day; reduced API latency by 35–50% via PostgreSQL indexing/partitioning and Redis caching.
- Integrated UPI, PayU, Plural, and ICICI payments with retries, observability, and idempotency; improved success rates by 20–25%.
- Designed event-driven processing with AWS Lambda + Kafka for real-time bill workflows, reconciliation, and reporting; automated bulk journeys and notifications.
- Strengthened security (OAuth2/JWT, RBAC, MFA, headers); reduced security issues by ~70%.
- Built React dashboards with reusable components, role-based views, form validation, and performance tuning.
- Modernized Rails services with service-objects, background jobs, ActiveRecord optimizations, and RSpec coverage.
- Developed services for REST APIs, background jobs, and data pipelines with structured logging.
- Mentored junior developers and contributed to sprint planning, production support, and observability improvements.

PROJECTS

Bharat Bill Payment System (BBPS) | Ruby on Rails, React.js, Kafka, PostgreSQL, Redis

Sep 2023 – Jun 2024

- Delivered workflows: bill fetch, validation, approvals, bulk payments; added branch/biller modules and notifications.
- Achieved 35% performance gains via caching and optimized queries; implemented TDS/LDC compliance thresholds.
- Built React views for bulk journeys, activity tracking, and management reports with role-based visibility.

Zoyer – Spend Management Platform | Ruby on Rails, React.js, PostgreSQL, Docker

Jun 2022 – Jun 2024

- Implemented finance modules (POs, invoices, payments), OCR, conditional approvals, and bulk vendor/payment features.
- Launched multi-currency support (INR, USD, GBP, EUR) across transactions and reports.
- Introduced RBAC policies, background jobs, secure file operations, and service-layer patterns.
- Built admin dashboards with filters, pagination, and exports; improved frontend bundle performance.

Payment Gateway Integration | Ruby on Rails, React.js, PostgreSQL, MongoDB, AWS S3

Apr 2023 – Aug 2023

- Integrated cards, wallets, and UPI with real-time tracking; automated reconciliation and reports, cutting manual work by 25%.
- Implemented bulk vendor/payment uploads; secured receipts with S3 pre-signed URLs and audit logs.
- Added utilities for data validation, CSV ingestion, and monitoring hooks.

EDUCATION

Sree Vidyanikethan Engineering College

B.Tech. | CGPA: 8.01

2018 – 2022

Tirupati, India
