SUMMARY

Results-driven Senior Technical Writer with 7+ years of experience creating clear, user-focused documentation for cloud platforms, APIs, developer tools, and enterprise applications. Skilled in developing user guides, API documentation, troubleshooting guides, release notes, SOPs, and onboarding content for technical and non-technical audiences.

EXPERIENCE

Senior Technical Writer Wells Fargo

- 07/2023 - Present Hyderabad, India
- Created structured FAQs, troubleshooting guides, operational run books, OneNote summaries, and short reference sheets
 - Owned complete documentation sets: User Guides, Admin Guides, Developer Docs, Architecture Docs, Configuration Guides, API Docs, and Integration Workflows
 - Proofread and updated technical articles using GitHub to maintain accuracy, clarity, and compliance with organizational standards.
 - Converted legacy HTML documentation into Markdown format, ensuring adherence to Markdown syntax and style conventions.
 - Defined documentation architecture, content taxonomy, navigation flow, and versioning strategy for scalability
 - Authored detailed High Availability (HA) documentation covering Kubernetes auto-healing, replica strategy, cloud-managed services (Postgres, Object Store, NFS), and distributed service behavior
 - Created complete Disaster Recovery (DR) documentation including Active-Active / Active-Passive models, RTO/RPO, failover workflows, backup & restore processes, and timelines
 - Built comprehensive REST API documentation, schema references, onboarding workflows, and environment setup content

Technical Writer And Editor Google

- 2019 - 06/2023
- Developed and maintained comprehensive, accurate, and user-friendly documentation for the Dev X platform, covering APIs, SDKS, developer tools, integrations, and platform features
 - Prepared and updated guides, tutorials, and sample code for developers to enhance their understanding of the platform
 - Created detailed API reference documentation with descriptions, parameters, responses, and example requests for all Dev X APIs
 - Worked closely with developers to understand and document SDKs, providing code snippets, example projects, and integration workflows
 - Developed step-by-step guides and use-case-based tutorials that help users accomplish common tasks and workflows on the platform
 - Explained complex technical concepts in an accessible manner for both novice and advanced users
 - Prepared release notes for new features, bug fixes, and updates
 - Created and edited the Virtualization and Containerization documents, providing offering-specific information using DITA XML.
 - Responsible for technical product group (TPG) specific documentation and content validation.
